

- ISBUC - Integrative Structural Biology at UCPH Annual Meeting 15. September 2017

PROGRAMME

The ISBUC Annual meeting is for all employees and students at the University doing science involving aspects of structural biology. The meeting includes five talks, a poster session and flash talks by the local participants and offers ample opportunity to get acquainted with the research and infrastructure available at the University.

The venue is free of charge for registered participants.

SPEAKERS

Cell division: learning from reconstitution

Andrea Mussachio, Max-Planck Institute of Molecular Physiology, Dortmund

Neutron protein crystallography and life science research opportunities at ESS

Zoe Fisher, ESS, Lund

Transport across membranes: near-atomic resolution insights from cryo-EM

Nicholas Taylor, C-CINA, Biozentrum, University of Basel

European XFEL – a new opportunity for structural biology

Robert Feidelhansl, European XFEL, Hamburg

Membrane interactions of amphiphilic peptides – importance for antimicrobial, anti-inflammatory, and anticancer properties

Martin Malmsteen, Department of Pharmacy, University of Copenhagen

VENUE

GEOCENTER, Ceremonial Hall, Øster Voldgade 10, 1350 Kbh. K
